

(Manager, (Senior) Consultant, Technical Architect (m/f) Java with an emphasis on Adobe CQ/SAP Hybris (solution design)

Location: München, Frankfurt, Düsseldorf and more

Job ID: 2014014

Structure your career at one of the global leaders in management consulting, technology and outsourcing. At our client, you will develop innovative solutions for top companies that start where other people's ideas end. Because, as part of an international team of experts, you will think end-to-end – from analysis to strategy through to implementation. For this reason, our whole is more than the sum of its parts - high performance results for our customers. Join our client now and benefit from individual promotion and be valued both personally and professionally.

#### Your responsibilities

Join our client's team and take on project management and leadership responsibilities as you control the development of customer-specific IT/business solutions as a technical director in major projects. As a sub-project manager you will have a role in steering all processes – from planning to design to the implementation of the solution. More specifically, you will engage in a dialogue with those responsible on the customer's end to define the project requirements, coordinate the schedule and phases of the project, create the software architecture, and ensure integration into the existing enterprise architecture. Your technical area of expertise is the requirements-based development and customization of solutions based on Adobe CQ and/or Hybris.

#### Your knowledge

- A degree in computer science (IT) or comparable training
- Several years of professional experience in web development in an Adobe CQ or SAP Hybris environment, preferably at an online agency or with a system integrator
- Experience working on sub-projects for major projects (volume >2 million EUR) including agile software development projects (preferably Scrum)
- Solid practical insight into web server architecture including DNS, load balancing, proxy, authentication, security, and firewall
- Familiar with the web analysis tools Omniture (Adobe), Coremetrics (IBM), Google Analytics, and Webtrends as well as solid expertise on the e-Commerce technologies Hybris, Oracle ATG, and IBM WebSphere Commerce
- The ability to think in abstract terms, a distinctly analytical mindset, strong communication skills, and mobility (willingness to travel)
- Strong communication skills in English

Drawing satisfaction from your own performance is daily routine when you work for our client. As are the many days that you will grow personally and professionally through the constantly new challenges and technologies. Through in-depth training and individual advancement, and through exchanging knowledge and experience with colleagues around the globe. We extend a warm welcome to you because we know that you will enrich us. With your abilities. With your questions. And with your application to us!
